This company overview of igojet is presented to give the reader a brief snapshot of our business jet travel service. The following areas are covered in this document:

- [Key Benefits](#)
- [How It Works](#)
- [Aircraft Types](#)
- [Feature Comparison](#)
- [Safety Overview](#)

Igojet Company Overview

Igojet provides a per-seat, on demand travel service used by Operators and Charter Brokers

Igojet technology enables Operators and Charter Brokers to arrange per-seat, on demand flights. Travelers can book trips by the seat at pre-quoted, all inclusive fares. Trips can be reserved on a date and with a departure or arrival time frame of travelers' choosing (on-demand).

Travelers will enjoy a safe, reliable travel experience typical of business aviation for trips where the costs of traditional whole-plane business aviation alternatives are difficult to justify. Companies will reduce air travel costs and enhance productivity across the organization by leveraging igojet as a low cost business aviation alternative.

key benefits

- ▶ Business jet travel at per-seat fares between \$2 - \$4 per mile vs. traditional business aviation's \$5 - \$10 per passenger seat mile*.
- ▶ Same travel convenience and time savings of traditional business aviation alternatives.
- ▶ Customized bookings to accommodate personal travel schedules.
- ▶ Ease of booking, flight tracking, and itinerary management.
- ▶ Adaptable to any aircraft and fleet.

* for illustrative purposes only; final pricing depends on Operator's designated aircraft

how it works

Request a starting and ending city for your itinerary. Next, select your dates of travel. Finally tell us when you want to fly so we can customize an itinerary that fits your schedule. Specifically, indicate the time frame within which you want to either depart or arrive for each segment of your trip.

Reserve arrival or departure time windows for each segment of your trip that best fit your schedule. Longer time windows will be quoted at lower fares since they allow us to more efficiently utilize operators' jet time and capacity. Your final flight times will be confirmed within reserved arrival or departure windows for each segment.

Confirm final flight times 1-2 days before, but no later than 6PM the evening prior to, your flights. You will only be charged upon final confirmation (itinerary changes made prior to this time can be made penalty free). Detailed information about your flights will be sent at this time. Should there be any delays or changes to your itinerary after confirmation, you will be immediately notified.

Check-in at the airport 20 minutes before your flight. A representative from the designated operator of your flight will be there to validate your identification, help with baggage, and ensure safe & secure passage. Should you need assistance with your itinerary, an Operator representative will be available to help.

aircraft

Operators and Brokers can leverage Igojet to arrange flights on the aircraft of their choosing. However, a critical component of a competitively priced per-seat model is to employ the right sized aircraft for customers' desired travel needs. Based on Operator's designated aircraft choice, Igojet will help determine fares and demand levels needed to achieve target revenues and profitability.

feature comparison

The following chart lists popular criteria by which travelers select business aviation services. The following primary business aviation options (Ownership, Managed, Fractional, JetCard, and Charter) are compared with Igojet's per-seat, on demand model:

	Full Aircraft Ownership	Managed/ Shared Ownership	Fractional Ownership	Jet Charter/ Card	Igojet
Security & Safety	●	●	●	●	●
Privacy & Confidentiality	●	●	●	●	●
Availability & Flexibility	●	●	●	●	●
Public Scrutiny & "Optics"	○	○	●	●	●
COSTS	●	●	○	○	●

LEGEND: ● = Excellent ● = Good ○ = Fair

safety

Igojet's customer aggregation process complies with all Federal Aviation Regulations pertaining to on-demand (i.e. Part 135) operations. FAA Part 135-certificated air carriers who operate flights arranged via our methodology and technology will remain in compliance with safety standards established with nationally recognized safety audit organizations.
